

4. Privacy and authorized data

The client uses YouTube API Services only for channel verification, upload, processing confirmation, retry safety and publication records. It does not sell API data, profile viewers, serve advertising or disclose authorized data to unrelated third parties.

Data accessed

- Channel ID and basic channel metadata.
- Owner-created title, description, tags, thumbnail, video file and schedule.
- Upload-session information, video ID and temporary processing status.
- OAuth refresh token retained only while the authorization remains active.

Retention and deletion

- Completed YouTube API response data is automatically deleted no later than 30 days after completion.
- Build and audit artifacts expire after no more than 14 days.
- Verified deletion requests are completed as soon as practical and within seven calendar days.
- Revocation is available through Google Account security settings.
- Deleting client-held data does not delete content stored by YouTube.

Security

- Least-privilege OAuth scopes.
- GitHub Actions Secrets; no secrets in source control or logs.
- Immutable channel-ID verification.
- Short artifact retention and automatic API-data pruning.
- Separate compliance and automation switches.
